

Set up for policy debate in Denmark

Denmark	
Goal	How secure is secure enough, so what is the acceptable risk? Or how are you going to make space for the coast? How can you make decisions in a fragmented environment?
Stakeholders	Target local networks, which address climate change, local dike associations and road authorities.
Form	A combination of a seminar and policy debate setting. In the morning organize a seminar of developments in Denmark and FAIR, before moving to a policy debate set-up

Set up for policy debate in Denmark

3 alternative approaches:

1. Danish Municipal Association Climate Network
2. Local framework at Ribe/Esbjerg
3. Local framework at Ringkøbing Fjord
