

# Stimulating Green Hydrogen Fuelled Transport Solutions

The Hydrogen Transport Economy (HyTrEc) 2 project is part of the Interreg VB North Sea Region Programme and is partly funded by the European Regional Development Fund.  
Total budget: € 5,246,271 ERDF Contribution: € 2,197,940 Project length 5 years.

For  
Business

For the  
Environment

For the  
Future

Developing the  
Fuel Cell Vehicle market  
and promoting the North  
Sea Region as a Centre of  
Excellence for fuel cells and  
range extenders.

Developing  
innovative methods for  
the production, storage  
and distribution of  
green hydrogen.

Implementing innovative  
green hydrogen  
transportation solutions  
involving vans, large trucks  
and refuse collection  
vehicles.

Improving the supply  
chain and training.
