➤ Circular Procurement

Began in 2017 Part of a project - Circular PP

Focus Second hand Furniture and closing the loop for furniture

Why Furniture?

Engaged procurement officer
(Local) market

Education seminars for procurement officers

- Procurement of second hand furniture and services like;
 - Reconditioning, upholstery, carpentry, painting and redesign
 - Inventory, Rent and Storage
 - Sell-back

- Framework contract
- 4 suppliers – already established market

➤ Circular signage and navigation

- + Possibility for circularity
- + Market readiness (local potential supplier)
- + Interest within the organisation (not all departments though)
- Framework agreement
- Circularity as a main goal

Signs continue..

- The supplier should together with the buyer create a system for purchasing and sustaining/maintaining of signs – Focus on PROCESS
 1. Reuse within the organisation (City of Malmö)
 2. Supplier reuse (built for disassembly)
 3. Recycling
- Other circular/sustainable requirement

Other circular procurements/processes

- + Catering
- + Baby strollers
- + ICT, smartphones (joint statement)
- + Waste management/collection
- + Textile (dialogue during contract)
- + Profile products
- + New Furniture
- + Company Bikes (fringe benefit)

Results so far

- + Better collaboration with suppliers
- + Priority list for furniture
- + 10% reused furniture in 2019 and 15% in 2020
- + 170 000 co2 saved for each year (furniture)
- + KPIs/monitoring for signage – great possibility

What can pilot on circular signs achieve?

< 20%

CO₂ Emissions

For each reused sq meter
of alumium we save 56 kg
CO₂

< 20%

Less raw material

Reuse of old signs and
use of reused material
will make this happened

Request for help with CO₂-
monitoring in procurment

Challenges

No “base line” – numbers/data
Might not be 100%

Decide upon KPIs togheter with
supplier

Tips to go circular

- + Start with something easy – likely to become a success!
- + Policy or practice first?
- + Find engaged allies (also suppliers)
- + Behavioral change
- + Be part of networks and look for external money
- + Monitoring – difficult but valuable (don't look for the perfect monitoring)
- + Statistics
- + Good examples
