Chances and limits of soil carbon for climate protection - techniques, capacities and analytics

Moderator: Hans Marten Paulsen (Thünen-Institute of Organic Farming)

Speakers:

- **Zaur Jumshudzade** (Thünen Institute of Organic Farming, Westerau, Germany)
- **Axel Don** (Thünen Institute of Climate-Smart Agriculture, Braunschweig, Germany)
- **Martin Wiesmeier** (Bavarian State Research Center for Agriculture, Germany)

Reliable determination of soil carbon stocks is key to monitoring the climate impacts of carbon farming and developing business models. Can you see the effects of different carbon farming practices in soils and what other aspects need to be considered for a proper reporting of climate impacts?
