A note on project advice

Many stakeholders are asking for more details about the new programme. See what we can inform about and what the limits are. [> Learn more](#)

FAQ about the new North Sea Programme

At our online Sneak Preview event, many stakeholders had questions. Watch the recording and see our list of Q&A. [> Learn more](#)

One step closer to the new programme

An independent screening concludes there is no need for a full Strategic Environmental Assessment for the future North Sea Programme. > [Learn more](#)

Project highlights

Study: Nature-based solutions reduce flood risk

Study based on a BwN project pilot in Scotland: Nature-based solutions help reduce flood risk even across large areas. > [Read the story](#)

Cities as drivers of green innovation

See how transnational cooperation empowers public buyers to drive energy industry innovation. > Read the story

North Sea places

The CopenHill in Copenhagen is a new breed of waste-to-energy plant topped with an artificial ski slope and world's highest climbing wall of 85 meters. Beneath the slopes, furnaces and turbines convert 440,000 tons of waste annually into enough energy to deliver electricity and district heating for 150,000 homes.
