

Who we are

**Wij laten
zien dat
het kan.**

DUURZAAMHEID ONTWIKKEL CENTRUM

DOC We show
→33 that it can
33 be done.

SUSTAINABILITY DEVELOPMENT CENTER

A hotspot for **Talent development** in the region. Where **young** and **old** learn to **build** a sustainable and circular world together

Where we **work** on **solutions** to **circular** sustainability and **energy issues** in the built environment

Where we **work** with **partners** to train **skilled staff** to accelerate sustainability in the region

Where, **together** with partners, we transfer **knowledge**, **advise** and **innovate** for and with the region

Development hydrogen course

- ▶ especially developed for mechanics
- ▶ for both existing and new-build homes
- ▶ we developed this course together with our stakeholders

Content hydrogen course

- ▶ Mechanics work on a real hydrogen installation setup in a home environment
- ▶ With all the necessary hydrogen work details in order to make this project possible
- ▶ Working with real installation setups to train the necessary skills, such as connecting hydrogen boilers, etc.
- ▶ What to do in case of a malfunction or a detected leak?
