TOPSOIL: Newsletter

An introduction to TOPSOIL

TOPSOIL is a EU cooperation supported by the Interreg VB North Sea Region programme in line with priority 3 of the programme: 'Sustainable North Sea Region, protecting against climate change and preserving the environment'.

A pilot in the picture: Sunds (Denmark)

The town of Sunds, located in Herning municipality, is being confronted with a groundwater table that is very close to the surface and subsequently reacts rapidly in response to increasing rainfall. Due to increasing precipitation as a result of climate change in the near future the town and adjacent fields are very likely to be flooded in winter periods.

5 questions to project manager Rolf Johnsen

As a conclusion to his first TOPSOIL newsletter we asked project manager Rolf Johnsen from Central Denmark Region what his experiences have been in this first phase of the project.
