16:30	Wrap up and thank you	All delegates
16:45	Conference close	All delegates
17:00	Networking	All delegates

About SURFLOGH

Surflogh is an international collaboration, within the Interreg North Sea Region VB Programme, prioritizing the development of green transport solutions in urban areas. Partners from the Netherlands, Belgium, the UK and Sweden jointly aim to develop cargo hubs that are really 'smart', efficient and sustainable.

As the Surflogh project approaches midterm, it is time to bring each other up to speed. The project partners want to share and exchange progress and ideas on smart, sustainable solutions for last mile delivery with our stakeholders from the transport and retail sectors, urban developers, universities and government authorities.

The Mid Term Conference will focus on the theme of 'Sustainable City Logistics in Action'.

Modern issues like increased online consumerism, with a 24-hour delivery promise, mean our cities are becoming more and more congested. Light Goods Vehicle (LGVs) are a significant contributor to congestion and emissions today in our cities. These crucial services are creating multiple, negative impacts on the liveability of our cities.

Whose problem is this and how can we take steps to solve some of the complex issues involved in current developments regarding freight and logistics? As an international collaboration, SURFLOGH aims to green 'last mile/first mile' delivery, developing cargo hubs that are really 'smart', efficient and sustainable.

Keynote Speakers

Richard Llewellyn,
Edinburgh Napier University, TRI

Dr Jonathan Cowie,
Edinburgh Napier University, TRI

Sam Keam,
Director, Zedify

Rob Fowler,
General Manager, DPD

Action Labs

- **Economic Viability – critical elements in creating a financially sustainable business?**
Hosted by Edinburgh Napier University & SEStran
- **Marketing sustainable city logistics**
Hosted by the City of Mechelen (Belgium)
- **Stakeholder engagement, issues and key requirements**
Hosted by the City of Groningen (the Netherlands)
 - **Learning by doing, key lessons and insights**
Hosted by the Provence of Drenthe (the Netherlands)
