

Decarbonizing the transport sector in Gothenburg and Västra Götaland

Tula Ekengren
Region of Västra Götaland

Roles of Västra Götaland

- Public transport
- Our own organization
- Regional development – programme for sustainable transport and programme for sustainable energy and bioinnovation

ElectriCity

- Trial of electrical buses in real traffic
- Necessary with cooperation
- Moving to 2.0

Arena for liquefied biogas

- Heavy duty vehicles on liquefied biogas
- 4+4 M€ in private and governmental investments/support
- 0,5 M€ in regional project to coordinate and evaluate the vehicles and gas infrastructure

Density

- Logistical solutions for central city areas
- Electrical trucks and garbage trucks
- Shared distribution
- Combined with city planning

”Hela Gröna Vägen”

- 39 municipalities in Norway and Sweden
- Support transition in companies and public sector
- No competition between alternatives

Thank you for your attention!
